CGPA Calculation & Conversion

$$CGPA = \frac{\sum_i (C_i \times GP)}{\sum_i C_i}$$

where   Ci   is the credit of the Course

GP is the Grade Point for that Course and

$\sum_i.$ is the sum over all registered courses successfully cleared during all the semesters

No class, division, or rank will be awarded to the students at the end of their program.

For the conversion of CGPA into percentage, the Senate has approved the following **conversion formula**:

i)   Students graduated till 10.11.2020

> **PERCENTAGE = 55 + {10 (CGPA – 6)}**

ii)   Students graduated from 11.11.2020

> **PERCENTAGE = CGPA multiplied by the factor of 10 (CGPA x 10)**
